AIR QUALITY STANDARDS: THE ROLE OF THE HEALTH EFFECTS INSTITUTE IN CONDUCTING RESEARCH: RCED-86-177BR

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. In response to a congressional request, GAO provided information on the Health Effects Institutes (HEI) scientific research on the effects of motor vehicle emissions on human health, specifically: (1) the adequacy of HEI organizational structure and internal controls; (2) the quality, credibility, and relevance of its research; (3) HEI success in reducing adversarial disputes over technical issues and scientific data; and (4) the cost-effectiveness of its research activities. The Environmental Protection Agency (EPA) and 24 automobile and engine manufacturers cofund HEI, which is a nonprofit corporation organized to provide unbiased, independent research on motor vehicle emissions hazards. GAO found that: (1) HEI has 49 research projects underway at an estimated cost of 15 million, has completed 4 of the projects, and will probably issue reports on 28 more by late 1986; (2) EPA and industry officials feel that HEI products are credible, of high quality, and objective; (3) EPA obtains 2 of research activity for each federal dollar provided; (4) EPA considers at least 44 percent of HEI research to be highly relevant to current regulatory and public policy issues; and (5) if funding is continued, more open dialogue between EPA and HEI could help to ensure that the number of mutually agreed-upon, relevant research projects increases. GAO believes that HEI is performing high quality research and found nothing to indicate that funding should not continue. This item ships from La Vergne, TN. Paperback.
