Agriculture is the outgrowth of a fertile soil; mining results from mineral resources; and from navigable waters spring navies and commerce. Every great branch of industry requires, for its successful development, the cultivation of kindred arts and sciences. Phases of life and modes of thought are thus induced, which give to different communities and states characters as various as the diverse rocks that underlie them. In like manner it may be shown that their moral and intellectual qualities depend on material conditions. Where the soil and subjacent rocks are profuse in the bestowal of wealth, man is indolent and effeminate; where effort is required to live, he becomes enlightened and virtuous; and where, on the sands of the desert, labor is unable to procure the necessities and comforts of life, he lives a savage. The civilization of states and nations is, then, to a great extent, but the reaction of physical conditions, and hence the propriety of introducing their civil, political and military history with a sketch of the geological substruc ture from which they originate. Geology traces the. History of the earth back through successive stages of development to its rudimental condition in a state of fusion. Speculative astronomy extends it beyond this to a gaseous state, in which it and the other bodies of the solar system consti tuted a nebulous mass, without form and motion. When, in the process of development,...
