If the essence of life is information carried in DNA, then society and civilization are just colossal memory systems - Batou Some say that a way for understanding the progress of the modern world is by keeping an eye on the innovations that occur in the world of data processing. A new tech solution is launched approximately every decade: first, there have been processors and personal computers; then the Internet revolution, followed by smart phones and ending with social networks. The current emerging innovation of this decade may be the connected world of computing relying on blockchain encryption. Prominent business figures from Bill Gates to Richard Branson have exalted the potential of the blockchain; British Prime Minister David Cameron has included a blockchain expert within his entourage. Blockchain technology can be used to record and track details of each transaction or property of any business, including tangible assets such as real estate, and intangible assets such as intellectual property. It can also be used to automate contracts through so-called Smart Contracts, greatly simplifying the creation and execution process of contracts between parties. The economy that Blockchain enables is not a mere movement of money, but it is the transfer of information combined with a decentralized and effective allocation of resources. The attention given to this technology by global giant players suggests that it will become the operational philosophy of the economic system of the future, ranging across many industries. Blockchain can become the solution we needed for speeding up the economy and transactions in order to keep up with our multi-device connected world. In this book, high tech expert Pat Nakamoto answers your questions concerning the future of Blockchain technology along...
