Redesigning the Planet: Global Ecological Design

By Alan Wittbecker

Createspace, United States, 2014. Paperback. Book Condition: New. 254 x 178 mm. Language: English . Brand New Book ***** Print on Demand *****.This work is about physical, ecological and political designs for sharing the global resources and services of the planet to meet the needs of all living beings and their community patterns. It uses ecological design to create a simple method to implement and manage the sharing. First, we assess what the planet needs to develop in a stable flow, then we set aside a satisfactory area of the planet to ensure the continuing operation of evolution in wild systems. Next, we measure the ranges of productivities of wild ecosystems as well as agricultural and urban systems, and use those results to determine optimum human populations for local places, regions and the planet. Finally, within human systems, every culture would claim a share of local resources and global services not set aside for wild regeneration. The equal apportionment of resources to all cooperating participants in the global commons is supported by the practice of recognizing and honoring the legacy of the entire planet that hosts its legatees as tenants, and is supported by the rule of all beings, although...
